VALUE OF WATER & RESTORED ECOSYSTEMS??

ML3 / R ???

A photograph of a woman in a red and white patterned headscarf and a red shirt, crouching on a rocky, arid landscape. She is washing laundry in a large, round, metallic tub filled with water and soap. To her left are two smaller black buckets, one containing white laundry and the other empty. To her right is a large pile of laundry, including various colored clothes and a red cloth. The ground is dry and rocky, with large boulders and a small stream of water flowing in the background. The overall scene conveys a sense of resourcefulness and resilience in a harsh environment.

**WATER SECURITY AND
RESILIENCE TO CLIMATIC
SHIFTS IS A KEY OUTPUT OF
LANDSCAPE STEWARDSHIP**
